Orange background, black legend

TYPICAL CA MINIMUM SIZE
48" x 24"

COMMON TCP PLACEMENT
Termination (downstream) area

CA MUTCD REFERENCE
CA MUTCD Part 6, Chapter 6F (Temporary Traffic Control)

FIELD USE NOTES

Marks the downstream end of a work zone, informing drivers that they have passed the work area and that normal conditions resume. In the field, G20-2 End Road Work is typically positioned at the termination (downstream) area. Common deployments include termination area at the end of a work zone; closes setups that began with ROAD WORK AHEAD; used on both short and long-duration operations. Always confirm its size, retroreflective sheeting, spacing, and placement against the CA MUTCD 2026 and the reviewing agency before finalizing the traffic control plan.
