

G20-5aP

Work Zone (plaque)

**CATEGORY**

Guide Signs

SHAPE

Rectangle

COLOR

Orange background, black legend

TYPICAL CA MINIMUM SIZE

48" x 24"

COMMON TCP PLACEMENT

Beginning of the work zone (advance/upstream)

CA MUTCD REFERENCE

CA MUTCD Part 6, Chapter 6F (Temporary Traffic Control)

FIELD USE NOTES

The G20-5aP Work Zone (plaque) sign is a California MUTCD work zone guide sign. It is shown here as an educational reference with the official FHWA Standard Highway Signs layout and California sizing guidance. In the field, G20-5aP Work Zone (plaque) is typically positioned at the beginning of the work zone (advance/upstream). Common deployments include used where work zone (plaque) conditions apply on a California project; selected and sized per the CA MUTCD and the roadway type; coordinated with the overall traffic control plan and permit. Always confirm its size, retroreflective sheeting, spacing, and placement against the CA MUTCD 2026 and the reviewing agency before finalizing the traffic control plan.
