FIELD USE NOTES

A striped object marker that delineates the edge of an obstruction, with the stripes sloping down toward the side traffic should pass. In the field, OM2-2V Object Marker (Type 2, Vertical) is typically positioned at the advance warning area, ahead of the work. Common deployments include delineating barrier ends and fixed objects; marking the side traffic should pass; used with other channelizing devices. Always confirm its size, retroreflective sheeting, spacing, and placement against the CA MUTCD 2026 and the reviewing agency before finalizing the traffic control plan.
