### FIELD USE NOTES

Designates a lane reserved exclusively for bicycle travel, indicating that motor vehicles must not use the marked lane. In the field, R9-6 Bike Lane is typically positioned at the at and in advance of the pedestrian/sidewalk closure. Common deployments include temporary bike lane designations through work zones; re-established bike lanes after lane shifts; multi-modal TCPs that maintain bicycle access. Always confirm its size, retroreflective sheeting, spacing, and placement against the CA MUTCD 2026 and the reviewing agency before finalizing the traffic control plan.
